SUMMARY

I like to think of myself as a "Forward Thinker" and a person who learns the most out of his experience. My international background has not only helped me overcome and surpass every cultural difference I have faced, but also enrich my professional environment. Working in a major multinational consulting firm is allowing me to acquire and improve a variety of skills in finance and internal audit within various industries. KPMG has also taught me how to perform under stress, be a better team player, address clients, be more goal oriented, and be a better leader.
